

Modular Construction Specialists

St-Rémi School
Beaconsfield

Our Expertise

As project management experts, we surround ourselves with the best professionals to deliver results that exceed our clients' expectations.

Our experience in the institutional sector has shaped an exemplary level of rigour, where quality and safety are our top priorities.

Over the years, we have specialized in managing modular construction projects.

This technology is expected to gain importance in the coming years: more efficient and more cost-effective, it is already redefining industry standards.

Modular construction is a method in which a building is manufactured in sections (modules) in a factory and then transported to the final site for assembly.

Once completed, the building is indistinguishable from a traditional construction.

The Advantages of Modular Construction

It offers significant time savings, as on-site work and factory fabrication can be carried out simultaneously.

Quality is better controlled, since working conditions are stable and minimally affected by changing weather.

Finally, this approach provides great flexibility, with the ability to dismantle and modify certain structures as needs evolve.

Queen Elizabeth II Hospital, Halifax

A More Sustainable Method

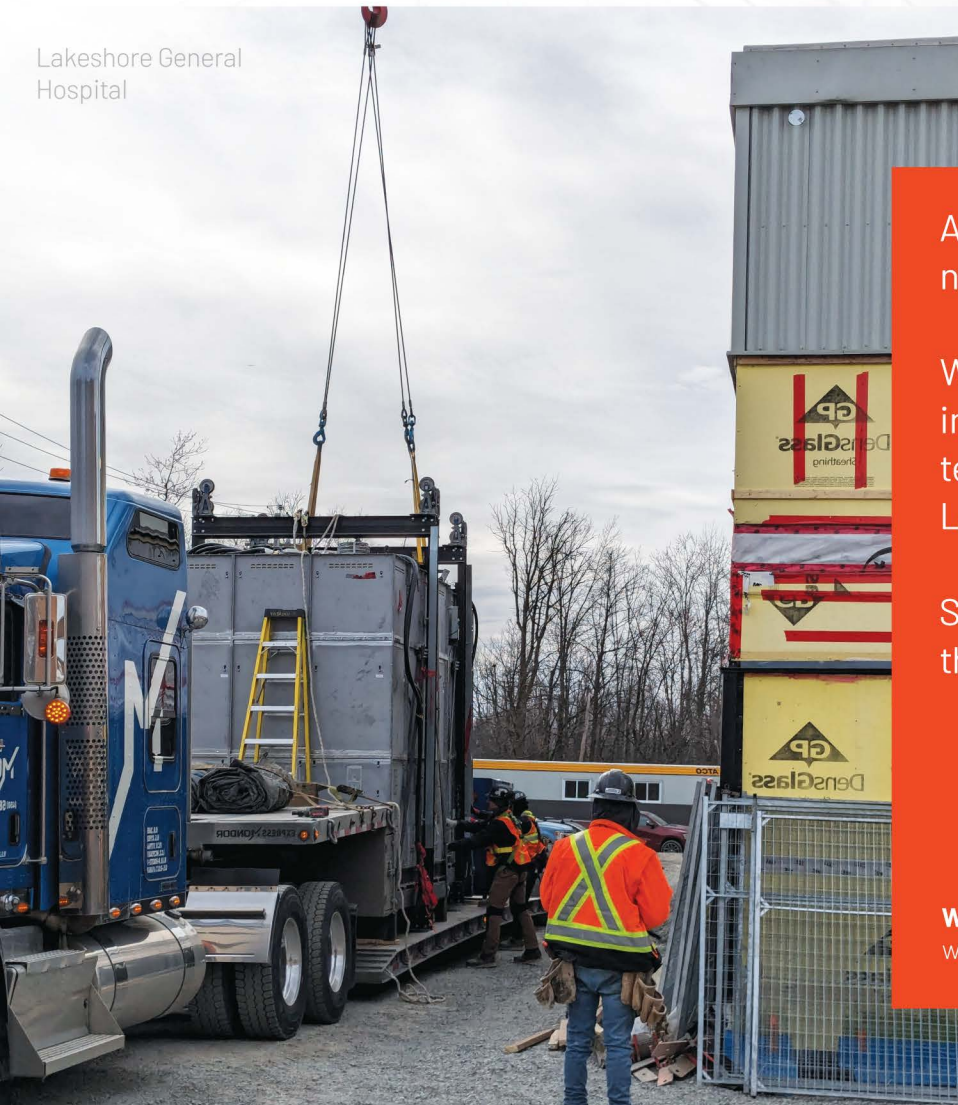

It is considered more sustainable because it generates less waste thanks to optimized factory production, reduces disturbances and transportation on-site, and enables a faster construction process that consumes less energy.

In addition, the modules are often better insulated, which reduces long-term energy needs.

Elevators in a Modular Building?

At Groupe DCR, we believe nothing is impossible.

We took on the challenge of installing elevators in the temporary modular unit at Lakeshore General Hospital.

Reuse

Strategically, modular buildings are an effective temporary solution, as they can be relocated to a secondary site for a new use.

The Future is Modular

The Minister of Health, Christian Dubé, firmly believes in the future of modular construction in Quebec.
